PETITION

We, the people of Stroud District recognise the momentous importance of decisions that need to be taken at the Copenhagen Climate Change Summit in December. We recognise that Climate Change will affect us and our children, but will affect even more severely many of the poorest people in the World and many of the life support systems of our planet. We therefore:

- congratulate Gordon Brown for attending in person and ask other World Leaders to attend as well;
- demand that a strong international agreement is reached to limit temperature rises in line with the latest available scientific evidence;
- demand that rich countries, as the main polluters are prepared to take the lead with the biggest cuts and by providing funding to poor countries also to take action;
- pledge to try to cut our own personal carbon use by 10% in 2010.
